

SMALL SCALE GREEN ROOFS

Learn about green roofs and their benefits, build a section of green roof, acquire practical skills to turn your shed, garage or flat roof into a wildlife haven

One day practical workshops aimed at landscape, roofing and building contractors, architects, DIY enthusiasts community organisations and anyone with an interest in building their own green roof.

Workshops run by **John Little** of the Grassroof company, **Dusty Gedge** of Livingroofs.org and with contributions from **hertalan UK**.

The one day workshop will involve:

Presentations on:

- Waterproofing issues
- Types of green roofs and green roof plants
- Benefits of green roofs
- Construction guidance

All participants will construct a small section of a green roof

The course fee includes:

a copy of the DIY GREEN ROOF guide written by John Little and Dusty Gedge

Courses in Essex, the Midlands and the Lake District will include a tour of green roofs associated with your hosts, if possible.

John Little has built over 20 greenroofs in Essex over the last 10 years. He is passionate about improving urban landscapes for wildlife.

Dusty Gedge has been an advocate of green roofs for over 10 years and has designed a number of seminal green roofs in the UK.

hertalan

hertalan were established in 1895 and have been specialist manufacturers of EPDM rubber membranes for over 40 years. They boast BBA and ISO 14001 certification and their membranes are approved by the German FLL organisation for their use on green roofs.
